Verification report: ITL2402420

1. Identification of the certification

Type of the certification report	Final Certification Report of Functionality – Singular License – Slot
Identification code of the report	ITL2402420
Details identifying the certification body	iTech Labs Italia REA RM-1282510 Dirección: Piazza Guglielmo Marconi n., 15 - 00144 Roma, Italy URL: www.itechlabs.it Email: info@itechlabs.it
Details identifying the report's signatory on behalf of the certification body	Alvin Rizaldi Eric Sheng Rogelio Pérez Cano (DNI 45430254X)
Dates on which the certification work was performed	From 09 August 2024 to 09 September 2024
Publication date of the certification report	09 September 2024

2. Description of certification purpose

Description of technical infrastructure	The set of equipment, systems, terminals, instruments and software material used by the operator for the organization, operation and development of the gambling activity. The technical game system supports all the necessary operations for the organization, operation and development of the gambling activity and the detection and recording of the corresponding transactions between the players and the operator.						
Identification of the software elements	<table><tr><th>Game Name</th><th>Channel</th></tr><tr><td>Fluffy Arcade: Doubleup Ducks</td><td>HTML5 Desktop</td></tr><tr><td>LuckyTap</td><td>HTML5 Mobile</td></tr></table>	Game Name	Channel	Fluffy Arcade: Doubleup Ducks	HTML5 Desktop	LuckyTap	HTML5 Mobile
Game Name	Channel						
Fluffy Arcade: Doubleup Ducks	HTML5 Desktop						
LuckyTap	HTML5 Mobile						
Licensee	Not applicable						
Manufacturer	Eyecon Alderney Limited Inchalla, Le Val Alderney GY9 3UL Contact: Helen Ackrill (helen.ackrill@ackrill.gg)						
Product name	<table><tr><th>Game Name</th><th>Channel</th></tr><tr><td>Fluffy Arcade: Doubleup Ducks</td><td>HTML5 Desktop</td></tr><tr><td>LuckyTap</td><td>HTML5 Mobile</td></tr></table>	Game Name	Channel	Fluffy Arcade: Doubleup Ducks	HTML5 Desktop	LuckyTap	HTML5 Mobile
Game Name	Channel						
Fluffy Arcade: Doubleup Ducks	HTML5 Desktop						
LuckyTap	HTML5 Mobile						
In all cases the data capture and storage regarding the components must be recorded	Not applicable ICS is out of scope (operator's responsibility)						
Critical Components and Digital Signatures	For the list of critical components, please refer to Appendix A.						
Certified access channels	Internet						
Certified websites and brand names	Not applicable						
Payment methods used during certification	Not applicable This certification is for games only						
Role of the Operator	Not applicable This certification is for games only						
Identification of the elements of the technical infrastructure where these are installed	Eyecon Alderney Limited games are hosted at the following location: Continent 8 Technologies

Reseed	Please refer to RNG certification report REF: ITL2401052_RNG_ES_Eyecon_04Jul24.pdf
Length of the space of different random numbers in bits	Please refer to RNG certification report REF: ITL2401052_RNG_ES_Eyecon_04Jul24.pdf
List of statistical tests	Please refer to RNG certification report REF: ITL2401052_RNG_ES_Eyecon_04Jul24.pdf

3.3.2 Analysis of the percentage return to player (RTP)

Description	RTP	Place of publication of the indicated percentages
Fluffy Arcade: Doubleup Ducks LuckyTap is a game that randomly award prizes from 3 to 14 with random multipliers for duck target without multiplier feature and elephant target with multiplier feature	93.117%	Game rules

3.3.3 Analysis of the game logic and the random events

Compliance with the specific rules of the game	Yes
Counterparty risk management system for bets	Not applicable This requirement is not applicable to the games in this certification
Audit of the changes in the configuration via parameters of the counterparty risk management system	Not applicable This requirement is not applicable to the games in this certification
Audit of the changes made by the staff on the bets	Not applicable This requirement is not applicable to the games in this certification
List of random events	Generation of symbols in base game and free spins, generation of prizes in features
Audit of the changes in the configuration via parameters of the game logic	Yes

3.4 Summary table of the integration tests

Singular License – Slot

Area and Reference to the Requirement	Rate
B.1 Gambling on offer	
B.1.1 Gambling on offer and gambling versions.	Not applicable (operator's responsibility)
B.1.2. Realisation of the gambling activity and correct accounting.	Not applicable (operator's responsibility)
B.1.3. Tracing the wager in relation to channels other than the internet.	Not applicable (operator's responsibility)
B.2. Monetary limits for participation	
B.2.1. Monetary limits for participation.	Not applicable (operator's responsibility)
B.3. Behaviour in relation to technical faults.	
B.3.1 Loss of connection with the customer.	Not applicable (operator's responsibility)
B.3.2. Error in the customer terminal.	Not applicable (operator's responsibility)

Verification report: ITL2402420

B.4. Internal control system.	
B.4.1 Completeness of OPT/ORT records.	Not applicable (operator's responsibility)
B.4.2 Completeness of JUT/JUD records.	Not applicable (operator's responsibility)

Fulfillment details of the technical requirements

Singular License – Common

Area and Reference to the requirement	Rate	Observations
1. Porcentaje de retorno y tablas de premios		
RES_TEC Anexo I. 3.1 Reglamentación básica del juego.	Comply	Except for the following requirements
Operator gambling systems must incorporate procedures necessary for fulfilling the requirements stipulated in every game's basic regulations and in the relevant ministerial order and also, in particular, the established requirements relating to: <ul style="list-style-type: none"> Claims by participants. Promotion of gambling activities. restrictions on participating. 	Not Applicable	Operator's responsibility
The operator shall establish a procedure, to be carried out at least on a monthly basis, which shall verify that the operator's gambling on offer is suited to the held licences. It shall also verify that the options and variant of each type of game comply with the current regulations and that the authorised software versions are being used.	Not Applicable	Operator's responsibility
The operator shall keep a record of active games at all times. The record shall indicate the game, option or variant, where appropriate, commercial name and the authorised version	Not Applicable	Operator's responsibility
RES_TEC Anexo I. 3.3 Porcentaje de retorno al participante	Comply	Except for the following requirements
The operator shall implement a procedure that shall help ensure the proper functioning of the expected return to the participant. It shall verify, at least on a monthly basis, that the return percentage to the participant obtained in any one of the gambling activities, options or variants, coincides with the expected value or ranges.	Not Applicable	Operator's responsibility
If any serious deviations are detected, the operator must deactivate the affected gambling activities, options or variants, until the problem is discovered and resolved. If improper functioning is confirmed, the operator shall notify the Directorate General for the Regulation of Gambling and state the cause, time period, the gamblers and amounts concerned as well as the adopted measures.	Not Applicable	Operator's responsibility
In those gambling activities where the return percentage may depend on parameters that are configurable on the technical system, such as prize tables, the operator shall keep a record of all changes to said parameters	Not Applicable	Operator's responsibility
RES_TEC Anexo I. 3.4 Tablas de premios.	Comply	Except for the following requirements
If there are jackpots or multiplying effects to the prizes shown on the screens, it must be specified whether or not the jackpot or multiplying effect affects the prize scheme.	Not Applicable	This requirement is not applicable to the games in this certification
The operator shall keep a record of prize tables for each game so that changes may be audited.	Not Applicable	Operator's responsibility
Prize tables may not be changed during the gambling activity unless such a case is stipulated in the particular rules and the participant has been adequately informed	Not Applicable	Operator's responsibility
2. Generador de números aleatorios

Parameters used	Please refer to RNG certification report REF: ITL2401052_RNG_ES_Eyecon_04Jul24.pdf
Confidence interval	Please refer to RNG certification report REF: ITL2401052_RNG_ES_Eyecon_04Jul24.pdf
Configuration parameter values	Please refer to RNG certification report REF: ITL2401052_RNG_ES_Eyecon_04Jul24.pdf
Reseeding procedures	Please refer to RNG certification report REF: ITL2401052_RNG_ES_Eyecon_04Jul24.pdf

5.2 Analysis of return to player

Description	RTP	A place where the referred percentage is published	Configuration parameters that may affect the RTP (Note if the game system can record the parameters change log)
Fluffy Arcade: Doubleup Ducks LuckyTap is a game that randomly awards prizes from 3 to 14 with random multipliers for duck target without multiplier feature and elephant target with multiplier feature	93.117%	Game rules	Not applicable

5.3 Analysis of the game logics and the random events

5.3.1 Bets

Risk Management System for Bets	Not applicable This requirement is not applicable to the games in this certification
Audit of Bets	Not applicable This requirement is not applicable to the games in this certification
Fund Management	Not applicable This requirement is not applicable to the games in this certification

5.3.2 Casino games, poker and other games

The RNG is used to generate the symbols in base game and free spins and generate the prizes in features. Evaluation of game rules and artwork was conducted to ensure that they satisfy relevant requirements in the guidelines and the game does work according to the game rules and artwork. Functional tests were conducted to verify that the game satisfies the relevant requirements in the guidelines. Emulation tests were conducted to verify that the game payouts are in accordance with the payable and maths. Source code examination was performed on critical components of the software to ensure that the games comply with the relevant standards and that there are no unintended functionalities.

6. Integration test details

Singular License – Slot

Area	Gambling on offer
Test reference	B.1.1
Test name	Gambling on offer and gambling versions.
Test description	The player's interface will be used to access the gambling on offer and check that it matches the specific licence. The available gambling on offer will be analysed from each type of application or terminal used for participation.

Verification report: ITL2402420

	<p>Each gambling activity and offered version will be analysed along with whether they correspond to the gambling activities and versions allowed by the basic regulations.</p> <p>Gambling is not required to perform this test, instead it will suffice to analyse the information published by the operator, whether it be the rules of the gambling activities or strictly informative details.</p>
Expected result	<p>The result will contain an account of the following information:</p> <ul style="list-style-type: none"> the marketed name of the detected gambling activities and versions. the applications or terminals from which they are available. the correlation with versions from the basic regulations. the version of the particular rules assessed. <p>This information will be compared with the descriptive questionnaire of the licence completed by the operator.</p>
Test type	FUNCTIONAL
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Gambling on offer
Test reference	B.1.2
Test name	Realisation of the gambling activity and correct accounting.
Test description	<p>The player's interface will be used to participate in gambling and:</p> <ul style="list-style-type: none"> check the correct accounting of bets, prizes, fees or others. in gambling activities where the operator charges a fee, it must be verified that the calculation of fees coincides with the calculation stipulated in the particular rules. an attempt will be made to enter a wager greater than the balance available in the gambling account. In specific gambling activities, it will be verified: For betting, that bets cannot be placed at times not prescribed by the particular rules, and especially following the close of a bet promotion, from the start of the event for conventional betting, or from the end of the event for live betting. For bingo, that cards cannot be bought outside the promotion period, or when the game has commenced. For poker or casino games, that bets cannot be placed outside the times designated in the particular rules. For slot machines, it will be checked that, when the slot machine game session automatically concludes due to the time or money limit set during the session's configuration, the game in progress closes in an orderly manner and the accounting is correct. Note: This test will be repeated for each type of application or terminal used for participation as well as for each gambling activity, version or form.
Expected result	<p>Functional</p> <p>The conformity of the above described verifications, broken down for each analysed version.</p> <p>It will be confirmed that a wager greater than the balance available in the gambling account cannot be made. The version of the particular rules will also be noted.</p>

Verification report: ITL2402420

	<p>Traceability</p> <p>The result will detail the tables, files or others containing the information.</p> <p>An opinion will be expressed on whether the recording system of the technical gambling system can recover information accounting for every situation and completely reconstruct the history of every game.</p>
Test type	FUNCTIONAL, TRACEABILITY
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Gambling on offer
Test reference	B.1.3
Test name	Tracing the wager in relation to channels other than the internet.
Test description	Where applicable, several wagers will be made from every channel other than the internet, e.g. SMS and telephone.
Expected result	<p>Traceability</p> <p>The system's records and traces of every participation channel used will be analysed. In the case of SMS and telephone channels, it will be confirmed that the following details are kept:</p> <ul style="list-style-type: none"> time/date of every message or phone call. telephone number from which the message or call was made. content of the message or call.
Test type	TRACEABILITY
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Monetary Limits for participation
Test reference	B.2.1
Test name	Monetary limits for participation.
Test description	<p>The system's compliance with monetary limits, i.e. maximum amounts for participation and prizes, will be verified.</p> <p>To this end, the certification body will participate in gambling and attempt to exceed each limit described in appendix III section two of the ministerial orders in relation to gambling activities.</p> <p>For online slot-machines, the system's compliance with both the monetary limit and time limit set at the beginning of the online slot-machine game session will be verified. It will also be verified that the amount of money a single participant can allocate to gambling on the slot machine may not exceed the balance held by the participant in his gambling account at the moment of initiating the online slot-machine game session, taking into account any increase to the balance by the winnings obtained during said session.</p>
Expected result	The performed tests and obtained result will be recorded.
Test type	FUNCTIONAL
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)

Verification report: ITL2402420

Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Behaviour in relation to technical faults
Test reference	B.3.1
Test name	Loss of connection with the customer.
Test description	Tests will be performed for commencing a game and then causing a connection loss with the central gambling unit. The connection will be re-established after 1 minute, 5 minutes or 15 minutes (different time intervals). The reaction of the system for concluding the game and its compliance with particular rules in this regard will be verified. This test must be conducted for each application or customer terminal and each gambling activity or offered form.
Expected result	Compliance with the particular rules will be noted. The result will state the consequent action of each application or customer terminal and for each gambling activity or form. The version of the particular rules that were analysed will also be included.
Test type	FUNCTIONAL
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Behaviour in relation to technical faults
Test reference	B.3.2
Test name	Error in the customer terminal.
Test description	A game will be started and then an unexpected shut down of the customer terminal will be caused. The terminal will be restarted after 1 minute, 5 minutes or 15 minutes (different time intervals). The reaction of the system for concluding the game and its compliance with particular rules in this regard will be verified. This test must be conducted for each application or customer terminal and each gambling activity or offered form.
Expected result	Compliance with the particular rules will be noted. The result will state the consequent action of each application or customer terminal and for each gambling activity or form. The version of the particular rules that were analysed will also be included.
Test type	FUNCTIONAL
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Internal Control System
Test reference	B.4.1
Test name	Completeness of OPT/ORT records
Test description	This test will compare the data in the SCI with the data held in the operator's information system for the purpose of assessing the

Verification report: ITL2402420

	<p>completeness of the SCI data.</p> <p>The following monthly data will be obtained: From the monthly OPT/ORT record:</p> <ul style="list-style-type: none"> • Wagered amounts. • Reimbursement of wagered amounts. • Prizes. • Prizes in kind. <p>This test requires access by the certification body to unencrypted real data. The operator must provide the certification body with unencrypted OPT/ORT files. The certification body must confirm whether the files correspond to the files actually stored on the operator's information system. The certification body is not required to have access to personal data.</p> <p>The certification body is not required to know the encryption key under any circumstances.</p>
Expected result	<p>The data of the OPT/ORT files will be compared with the lists obtained from the back-office application of the technical gambling system. The certification body must be certain of the accuracy of these lists since they are the source against which the completeness of the SCI's real data is compared.</p> <p>As a result of this test, the certification body must include:</p> <ul style="list-style-type: none"> • The conformity of the performed checks. • Calculated on the basis of monthly data, the following OPT/ORT data for every month: <p>The ratio between the prize amount and the amount wagered in gambling (to 4 decimal places).</p> <p>Note: The result will not directly include the turnover figures.</p> <p>Note: The checks and calculations will be done separately, both in the Euro currency and in any other units, whether bonus points or others.</p>
Test type	REAL DATA
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Internal Control System
Test reference	B.4.2
Test name	Completeness of JUD/JUT records.
Test description	<p>This test will compare the data in the SCI with the data held in the operator's information system for the purpose of assessing the completeness of the SCI data.</p> <p>The following daily data corresponding to the 5 days prior to the test will be obtained:</p> <p>From the JUT/JUD records:</p> <ul style="list-style-type: none"> • Number of games for each gambling form • A random sampling of 5 games will be taken and their data will be compared with the operator's information system. For example, the participants, the prizes, the event in the case of a bet or the number of SMS's in the case of a competition. <p>This test requires access by the certification body to unencrypted real data. The operator must provide the certification body with unencrypted JUT/JUD files. The certification body must confirm whether the files correspond to the files actually stored on the operator's information system. The certification body is not required to have access to personal data.</p>

Verification report: ITL2402420

	The certification body is not required to know the encryption key under any circumstances.
Expected result	<p>The data of the JUT/JUD files will be compared with the lists obtained from the back-office application of the technical gambling system. The certification body must be certain of the accuracy of these lists since they are the source against which the completeness of the SCI's real data is compared.</p> <p>As a result of this test, the certification body must include:</p> <ul style="list-style-type: none">• The conformity of the performed checks. <p>Note: The result will not directly include the turnover figures.</p> <p>Note: The checks and calculations will be done separately, both in the Euro currency and in any other units, whether bonus points or others.</p>
