## 6. Details of Integration Tests

<b>Area</b>	<b>User registration and exclusion checks</b>
Test reference	A.1.1

## Verification report: ITL2401073

Test name	Addition of user registration
Test description	<p>From the participant's point of view, registration will proceed in the case of:</p> <ul style="list-style-type: none"><li>- A participant resident in Spain who has correct identity details, is of legal age and does not appear in the RGIAJ.</li><li>- A non-resident participant.</li></ul> <p>This test must be performed by all operators regardless of whether user registration is necessary for gambling or for the recording of winners.</p>
Expected result	<p>To be included in the result is the ID, date and time that each entry has been made, so that the National Gaming Commission can verify later that the verification services of CNJ have been consulted.</p> <p>In registration for non-resident, include the code used to identify the customer, date and time at which testing was performed.</p> <p><b>FUNCTIONAL</b> Should be validated that the user has been in the system. The system should collect from the participant all participant information fields described in Annex I section 2.1.1 RES_TEC (Please refer to the APPENDIX section at the bottom of this document)</p> <ul style="list-style-type: none"><li>- For non-resident participant, the system should request a copy of an ID.</li></ul> <p><b>TRACEABILITY</b> Analysis of the logs and system traces that collects data from user registration. Should be able to verify the traceability of the acceptance of the game contract signed by the player.</p>
Test type	FUNCTIONAL, TRACEABILITY
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

<b>Area</b>	<b>User registration and exclusion checks</b>
Test reference	A.1.2
Test name	Checks on individual prohibitions
Test description	<p>From the participant's point of view, registration will proceed in the case of:</p> <ul style="list-style-type: none"><li>- A participant resident in Spain who provides incorrect identity details.</li><li>- A participant resident in Spain with correct identity details, who appears in the RGIAJ.</li><li>- A participant resident in Spain with correct identity details but who is underage.</li><li>- A participant not resident in Spain who is underage. The test must be conducted with the operational verification services of the Directorate General for the Regulation of Gambling.</li></ul>
Expected result	<p>The result will include the DNI, time and date of every registration, so that the Directorate General for the Regulation of Gambling may later confirm that its verification services have been used.</p> <p><b>FUNCTIONAL</b> The system must not allow the registration of minors, persons appearing in the RGIAJ or those whose verification details are incorrect.</p> <p><b>TRACEABILITY</b> The system's records and traces which collect the user registration details will be analysed.</p>
Test type	FUNCTIONAL, TRACEABILITY

## Verification report: ITL2401073

Test reference	A.1.3
Test name	Validation of the DNI/NIE field
Test description	This test will verify that the internal control system uses mechanisms to avoid the following scenarios: - The introduction of wrong values into the DNI or NIE, such as, format errors, or letters not matching the number. - The activation of a user registration despite errors in the DNI or NIE. - Confusion of the NIE field for that of the DNI and vice versa.
Expected result	The actions of the system for each of the above scenarios must be described along with an assessment on such actions.
Test type	FUNCTIONAL, TRACEABILITY
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

<b>Area</b>	<b>Gambling account, amounts paid and collected</b>
Test reference	A.2.1
Test name	Correct recording of transactions on the gambling account.
Test description	From the participant's point of view, deposits and withdrawals will be made on the gambling account.  The possibility of performing other operations on the gambling account will be analysed.
Expected result	The result will include the DNI, time and date and a description of every transaction carried out, so that the Directorate General for the Regulation of Gambling may later confirm that the data is correctly recorded in the internal control system  FUNCTIONAL The proper accounting of deposits and withdrawals on the gambling account will be confirmed. If there are other operations available on the gambling account, the result will include a list of them. It will be confirmed that there is no account operation that allows a participant to receive credit from the operator or to make transfers to another participant.  TRACEABILITY The system's records and traces which collect the deposit and withdrawal details will be analysed.
Test type	FUNCTIONAL, TRACEABILITY
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

<b>Area</b>	<b>Limits on deposits</b>
Test reference	A.3.1
Test name	Depositing in excess of limits
Test description	The system will be accessed with an account that has a default daily, weekly or monthly deposit limit.  The limits will be reduced to €10, €15 and €20 respectively. Deposits under the limit will be made. Deposits over the limit will be made.  Each limit, whether daily, weekly or monthly, must be tested by using various

## Verification report: ITL2401073

	time-frame combinations.
Expected result	FUNCTIONAL The system allows limits to be reduced. The system allows deposits under the limit but does not allow deposits over the limit.  TRACEABILITY The system's records and traces which show the changes to limits will be analysed.
Test type	FUNCTIONAL, TRACEABILITY
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Limits on deposits
Test reference	A.3.2
Test name	Deposit limit details
Test description	The system's real data will be checked to ascertain how many participants have limits greater than the predetermined limits.  If there are participants who have limits greater than the predetermined limits, it will be verified that the requisite applications for increasing limits were correctly made and assessed. For the purposes of this test, a sample of 5 participants will suffice for the check.
Expected result	The result will include the identification code "PlayerID" of the analysed participants along with the dates when the applications for increasing limits were made and the dates when they were authorised. The system will be checked to ensure it keeps the records and traces of the applications, analyses and authorisations for the limit increases.
Test type	Real Data
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)
Qualification	Not applicable (operator's responsibility)
Observations	Not applicable (operator's responsibility)

Area	Internet. Redirection to a ".es" domain name
Test reference	A.4.1
Test name	Redirection to a ".es" domain name
Test description	The operator will supply the certification body with the list of websites without the ".es" domain where gambling is offered by its parent company, subsidiaries or itself.  The certification body will access each website from a Spanish IP address and verify the redirection.
Expected result	The redirection to the ".es" domain will be confirmed. The certification body will list the websites without the ".es" domain that were accessed in this test.
Test type	FUNCTIONAL
Date/time of test performance	Not applicable (operator's responsibility)
Obtained result	Not applicable (operator's responsibility)

## Verification report: ITL2401073

Test reference	A.5.1
Test name	Completeness of RUT and CJT records.
Test description	<p>This test will compare the data in the SCI with the data held in the operator's information system for the purpose of assessing the completeness of the SCI data.</p> <p>The following monthly data will be obtained: From the monthly RUT record:</p> <ul style="list-style-type: none"><li>• Number of registrations.</li><li>• Number of participants according to status.</li></ul> <p>From the monthly CJT record:</p> <ul style="list-style-type: none"><li>• Opening balance.</li><li>• Deposits.</li><li>• Withdrawals.</li><li>• Wagered amounts.</li><li>• Reimbursement of wagered amounts.</li><li>• Prizes.</li><li>• Closing balance.</li><li>• Prizes in kind.</li><li>• Other transactions.</li></ul> <p>This test requires access by the certification body to unencrypted real data. The operator must provide the certification body with unencrypted monthly RUT and CJT files. The certification body must confirm whether the files correspond to the files actually stored on the operator's information system.</p> <p>The certification body is not required to know the encryption key under any circumstances.</p>
Expected result	<p>For the monthly RUT:</p> <ul style="list-style-type: none"><li>• The data of the RUT file will be compared with the lists obtained from the back-office application of the technical gambling system.</li></ul> <p>The certification body must be certain of the accuracy of these lists since they are the source against which the completeness of the SCI's real data is compared.</p> <p>For the monthly CJT:</p> <ul style="list-style-type: none"><li>• The data of the CJT file will be compared with the lists obtained from the back-office application of the technical gambling system.</li></ul> <p>The certification body must be certain of the accuracy of these lists since they are the source against which the completeness of the SCI's real data is compared.</p> <ul style="list-style-type: none"><li>• The opening balance of one month will be confirmed to be equal to the closing balance of the previous month.</li><li>• The closing balance will be confirmed to equal the sum of the opening balance and the total of all transactions for that month.</li></ul> <p>As a result of this test, the certification body must include:</p> <ul style="list-style-type: none"><li>• The conformity of the checks made and substantiation for those checks.</li></ul> <p>NOTE: The checks and calculations will be done separately, both in the Euro currency and in any other units, whether bonus points or others.</p>
