Cascades

Symbols in winning combinations explode and disappear. Those symbols are then replaced by symbols coming down from above on the reels, and form the right on the carousel. This can give you even more wins! Cascades will continue until there are no more wins.

Every winning symbol, excluding the Elephant symbol, is part of a cascade.

The win multiplier starts at 1 for each paid spin and is then increased with each new cascade. The win multiplier applies only to way wins, it does not apply to scatter wins.

Substitute

The Claw symbol substitutes for all other symbols except the scattered Elephant.

The Claw symbol appears on the carousel only. When the claw symbol appears on the Carousel and it is involved in a winning combination, it will descend to pick up a random Wild Multiplier and return to the Carousel.

Wild Multiplier

There are five multipliers. The random wild multiplier will have a value from 1 to 5, this range of values is the same for base games and free games. Each Claw with a multiplier will multiply the total win for that way combination by the value of the multiplier.

If more than one Claw with a multiplier is involved in a win then the values of the multipliers are multiplied together before they are applied to the total win for that way combination.

Scatters

The Elephant symbol is the scatter. Scattered wins pay only. The highest scatter win only is added to the way wins.

Scatter wins are multiplied by the total wager.
